

InnoTrans

International Trade Fair for Transport Technology
- Innovative Components · Vehicles · Systems -

Facts & figures (reference year 2010)

Total area (m ²)	141,161
Net area halls / outdoor area (m ²)	81,171
incl. rails (m)	3,041
Total no. of exhibitors	2,243
No. of foreign exhibitors	1,244
No. of countries represented	45
Total no. of visitors	106,600
No. of trade visitors (incl. congress)	103,295

Participation fees, 2012:

Indoor space/row stand (EUR/m ²)	T230.00
Rail space (EUR/m) / outdoor area (EUR/m ²)	T170.00
Frequency	Every two years
Date of next event	18-21 September 2012
Open to general public/outdoor area	22-23 September 2012

Brief description

With a large number of reference projects and over 220 transport technology firms, Berlin is the main focus of Germany's transport engineering industry and an ideal venue for InnoTrans, an international platform for buyers and sellers of passenger and freight transport technology. InnoTrans has become established as an international industry showplace focusing on Railway Technology. A full range of rail vehicles are presented on the Messe Berlin tracks located outside the exhibition halls. Other key InnoTrans segments include Railway Infrastructure, Interiors, Public Transport and Tunnel Construction.

The InnoTrans Convention taking place in conjunction with the trade show includes a special Dialog Forum organized by Deutsches Verkehrsforum (German Transport Forum), Verband Deutscher Verkehrsunternehmen (VDV, Association of German Transport Companies), the European Rail Transport Industry Association (UNIFE) and Verband der Bahnindustrie in Deutschland (VDB, German Rail Industry Association). Initiated and organized by Deutsche Bahn AG, the Global Rail Leaders' Summit (GRLS) offers excellent dialogue opportunities for transport ministries and general managers of international rail transport companies. The Tunnel Construction segment will be accompanied by the International Tunnel Forum featuring a series of discussions with international guest speakers and supported by STUVA (Incorporated Association for Underground Transport Systems). The Public Transport Forum organized by Planungsbüro für Verkehr (PBV) and ETC Consultants focuses on current and future developments in public transport systems. With the Public Transport & Interiors Hall Forum (PTI Hall Forum) two segments received their own program area where the Speakers' Corner, the International Design Forum and the DB Suppliers' Forum takes place. At the DB Suppliers' Forum the Deutsche Bahn goes into direct conversation with their suppliers.

Products on display

Railway Technology > Rail vehicles for passenger and freight transport / subassemblies and components (drives, transmissions, couplers, brakes, etc.) / vehicle maintenance. Interiors>vehicle equipment, Infrastructure > Infrastructure / route technology. Public Transport > Local and regional buses / stationary systems / passenger information systems / fare management / information technologies / traffic management / communications / data processing / freight traffic logistics / consulting, financing, passenger and freight transport firms, associations, science and research. Tunnel Construction > Construction machinery, parts and accessories / communications and safety technologies / ventilation systems / power and lighting systems / interior construction / repair & maintenance / construction products and materials / services / consulting.

Visitor target groups

International representatives from the following fields: public and private transport companies and operators, manufacturers and suppliers of transport technology, construction companies, engineers , engineering, geology, mining, consulting, public administration and government, trade associations and institutions, science, research & development, media.
